

## STP-M8A-G000SF-STCK-11

### GREEN RESETTABLE TRIPLE POLE BREAK GLASS

M8 triple pole Call Point is ideal for use with security controlled locking systems, and provides a flexible solution for integrated systems which require greater functionality in the access control market. The product comprises three change-over outputs which allow the call point to switch three separate circuits. To ensure failsafe unlocking of the exit it is considered best practice to cut both connections, positive and negative, to the magnetic door lock.

#### FEATURES

- Easy 'Plug & Play' installation
- Single activation allows signal to three separate circuits
- High grade components maximise operational life
- Operates on 12V and 24V systems, making the range ideal for security applications
- Suitable for indoor applications only

#### TECHNICAL INFORMATION

- Green resettable triple pole break glass
- Contact Ratings: 2 A @ 12 - 30voltage direct current
- Flexible
- Cable terminal size: 0.5-2.5mm<sup>2</sup>
- Body case: PC/ABS
- Operating element: Glass or polycarbonate
- Operating temperature: -10°C to 55°C
