

STP-RECEIV1

WIRELESS RECEIVER FOR REMOTE ACCESS 12VDC

The RECEIV1 enables wireless remote control of equipment such as electric locks garage doors and gates. It has two programmable relays which are triggered by transmitter fobs and has a range of up to 50 metres. Includes 2 transmitters.

FEATURES

- 1 receiver, plus 2 transmitter fobs
- Up to 80 transmitters can be added
- 2 programmable relays (variable time delay and latching mode option)
- Easily programmable
- Rolling-code security
- Button guard prevents accidental use

TECHNICAL INFORMATION

- Wireless range: Up to 50m
- Wireless frequency: 315MHz
- Number of fobs: Maximum of 80
- Supply voltage to receiver: 12Vdc
- Current draw: 22mA min. / 55mA max.
- Relay setting: 0.5 - 9 sec + latching
- Relay contact rating: 3A @ 30Vdc
- Receiver dims: 90mm x 60mm x 22mm
