# SURFACE METAL TRAFFIC LIGHT 12VDC

This traffic light indicator is ideal for providing a visual indication as to the door's locked/unlocked status. A control signal is required from the lock to change the red/green LED indication.

#### **FEATURES**

- Surface mount only
- Metal faceplate and back-box
- Separate red and green LEDs with large lenses
- Used as a visual indication whether door is locked or unlocked
- 'Stable' or 'Flashing' LED operation (selectable via jumper)

#### **TECHNICAL INFORMATION**

• Input voltage: 12-24Vdc

• Current draw: 40mA @ 12Vdc / 70mA @ 24Vdc
